I. ACTION ITEMS:

1. Minutes from the March 21, 2019, Graduate Council meeting. A motion to approve was made, seconded, and passed unanimously.

CERTIFICATES:

2. Proposal from the Herbert Wertheim College of Engineering for a modification to the curriculum of the graduate certificate in Transportation Operations and Planning (#13604). Dr. Lily Elefteriadou was present for discussion.
   GC Member: How many students are currently enrolled in the program and how do you think this curricular change to add more electives will affect those numbers?
   Dr. Elefteriadou: There are five students currently, and we anticipate that making the program more flexible will increase student enrollment.
   A motion to approve was made, seconded, and passed unanimously.

3. Proposal from the College of Veterinary Medicine for a new graduate certificate in Care and Conservation of Aquatic Animals (#13661). Dr. Iske Larkin was present for discussion.
   GC Member: What is the motivation for requiring 12 credits for completion of the certificate instead of 9?
   Dr. Larkin: We have students who are either more interested in fish or mammals, but we wanted to have a common core of courses that both students would take and not have the courses feel uneven for either group.
   A motion to approve was made, seconded, and passed unanimously.

CONCENTRATIONS:

4. Proposal from the College of Design, Construction and Planning for a new concentration in Themed Environments Integration for the Master of Science with a major in Architectural Sciences (#13634). Mr. Stephen Bender was present for discussion.
   GC Member: How is the job market for graduate students in this field?
Mr. Bender: This new concentration is created in response to the needs of the industry. Those individuals who have the most experience are retiring out of the field, and there is an energetic, younger group of people coming into the industry but they do not have the interdisciplinary experience that companies are looking for, so we want to use the strengths of DCP to help these students.
A motion to approve was made, seconded, and passed unanimously.

5. Proposal from the College of Public Health and Health Professions to add the secondary concentration in Clinical and Translational Science to all existing concentrations within the Ph.D. in Public Health (#13066).
Dr. George Hack was present for discussion.
A motion to approve was made, seconded, and passed unanimously.

II. INFORMATION ITEM:

6. Graduate Programs – Distance and Self-Funded
   • Graduate certificate in Implementation Science

The meeting was adjourned at 1:22 p.m.
